

### Lu-6 COLD IMPACT LUBRICANT

Item #: 868061

EAN : 3660338219382

#### Description

Produces an intensive cryogenic shock by reducing the temperature of object to -39°C, causing them to shrink (particularly metal objects), braking the rusty surface by creating micro-cracks.

Molybdenum disulphide grease reaches deep into the blocked joints, efficiently lubricating even the rustiest areas.

Creates a long-lasting corrosion-resistant emulsion, facilitating subsequent dismantling through continuous lubrication.

#### Applications

For professional use only.

Ideal for threaded joints, hinges, pins, locks, mechanical couplings, wire ropes, valves, axles, tapes etc...

#### Characteristics

- |                  |                         |
|------------------|-------------------------|
| - Gross volume   | 650mL                   |
| - Net volume     | 500mL                   |
| - Propellant gas | Butane/propane          |
| - Components     | Please refer to the SDS |

#### Instructions

Shake before use. Spray on surfaces to be treated Wait for the product to soak in before attempting to move the blocked objects.

#### Packaging

- Unit
- Carton of 12 aerosols
