

Gr-2 HIGH TEMPERATURE ALUMINIUM GREASE

Item #: 840634

EAN : 3660338061943

Description

High temperature lubricant, penetrating oil, friction and corrosion preventer.

Minimize high temperature seizing hazards.

Resists to high pressures seizing and water steam.

Eases assembling and removal of pitched assemblies as well as sealing. Anti corrosion effect, leaving a protective layer on parts such as bolts, nuts, studs exposed to saline atmosphere. Prevent any seizing and pull out hazards for pieces exposed to high temperatures.

Maximum service temperature: 800°C.

Applications

Effective solution for lubrication, assembly and removal of the following parts: bolts, threads, brake shafts, exhaust collectors, nuts, spring leafs and clamps, gates, cup gaskets, threaded connections, naval or mining equipment, rolling mills and boilers.

Characteristics

- | | |
|------------------|-------------------------|
| - Gross volume | 650mL |
| - Net volume | 500mL |
| - Propellant gas | Butane/propane |
| - Components | Please refer to the SDS |

Instructions

Shake well before use. Directly spray on the treated parts, 20cm from the surface. Immediate lubricating properties. Do not spray on hot surfaces.

Packaging

- Unit
- Carton of 12 aerosols
